

Customer Spotlight: Agriculture AMPRO Laboratories

Cumming, GA • americanproteins.com

Company Profile:

AMPRO Laboratories, a division of American Proteins, is one of the fastest growing independent laboratories in the southeast. Rapid, reliable testing using state-of-the-art equipment and extensive instrumentation has made AMPRO Laboratories a valuable resource to a wide range of customers, from individual homeowners who need coliform testing on drinking water to major corporations with complex testing needs.

AMPRO Laboratories staff upholds a strong commitment to technology, quality and service for customers in a number of different fields including industry manufacturers, consulting firms, waste management companies, agribusiness, health departments, county agents, realtors and mortgage lenders. Their analytical chemistry services include wastewater testing, drinking water testing, nutritional values, feed and ingredient testing, mineral contents, pesticide screens, microbiologics, soil testing and superfund and other RCRA testing requirements.

AMPRO Laboratories' goal is to meet customer requirements with the highest level of analytical service and information.

Their Challenge:

AMPRO Laboratories' criteria for their new LIMS purchase was speed, accuracy, dependability, and the ability to manage an increasing amount of data produced in their analytical testing facility, which provides services for environmental, industrial and private customers.

Our Solution:

After evaluating several different LIMS systems, AMPRO Laboratories decided that Sample Master® Pro met all of their needs.

Since implementation, AMPRO Laboratories has seen a significant increase in productivity due to Sample Master® Pro's powerful reporting capabilities. In addition to over 70 standard reports and queries that users can modify, Sample Master® Pro also provides custom reporting capability and friendly report editing tools, allowing users to create tailored user-requested queries and reports as needed.

AMPRO Laboratories also depends on Sample Master® Pro for its integrated invoicing capabilities in the Sample Tracking module. Users can track analyses by customer, assign costs to particular tests and apply discounts, and generate invoice reports that can be placed on the Task Manager and automatically printed or emailed when results are complete and reported.

At AMPRO Laboratories, Sample Master® Pro has increased productivity, enhanced data quality and automated mundane tasks.

“ Sample Master® Pro has provided exactly what we needed when we purchased the system and ATL has provided excellent support to our system. ”

Wanda Ledford, Laboratory Manager
AMPRO Laboratories

Accelerated Technology Laboratories, Inc. provides data solutions for Fortune 500 companies and to a variety of industries including water & wastewater, analytical, energy, environmental, food & beverage, chemical, government, public health, industrial hygiene, biotechnology, forensics, clinical testing and manufacturing. Founded in 1994, ATL launched the first commercially-available Windows-based Laboratory Information Management System (LIMS). Today, our products are running in over 450 laboratories around the world with over 45,500 users, and supported by a steadfast commitment to excellence in product quality, support and training. ATL is one of few independent LIMS firms that is ISO 9001:2008 certified. ©Accelerated Technology Laboratories, Inc. All rights reserved.
