Trusted outcomes, powered by science

About Sample Master iMobile

Sample Master® iMobile is a web application that leverages Wi-Fi, 4G/5G technology to facilitate real-time collection and delivery of test data back to the LIMS.

Laboratories continually search for ways to reduce costs, increase service, and remain competitive. Those organizations performing laboratory analysis and/or QA testing, either in the field or simply away from computer access, will benefit from the improved data quality, elimination of paper forms, and rapid logging of sample data that comes with the use of Confience's iMobile Application for our Sample Master LIMS.

Using smart phones and tablets, organizations can:

Conduct sample login at the point of activity

Access the pre-scheduled sample list from the LIMS

Collect, access and evaluate critical information instantly

Generate an electronic chain of custody

Record GIS coordinates of sampling location

Document images, view SOPs, view maps

Many of the default features in the Confience iMobile Application are user-configurable. This allows the customer to configure the application to meet organizational needs and facilitate rapid turn-around of results for clients.

Operational Excellence

- Increases productivity by decreasing redundant administrative tasks
- Eliminates paper forms manually completed in field
- Accelerates information transfer and minimizes transcription errors
- Improves efficiency and enhances data quality
- Allows data caching for locations without access to a Wi-Fi or cellular signal
- Users can create new sample logins on the fly
- Automatically jumps to sampling locations when collector is within 100 feet

iMobile Application for Sample Master

- Easily retrieves pre-logins from the LIMS, along with relevant project information
- Runs on qualified mobile devices with an outward-facing browser
- Is seamlessly integrated with Sample Master LIMS

Confience

Confience is driven by the mission to provide automated lab management and data their customers can act on to build trusted products and a thriving planet. The result of a recently announced merger between Accelerated Technology Laboratories (ATL) and Quality Systems International (QSI), Confience offers LIMS solutions that empower lab and quality managers to accurately gather, analyze, and report data, work efficiently and intuitively, meet compliance goals, and exceed business objectives.
